

Answer Key

1) What does SQL stand for? (v31)

Correct Answer: A) Structured Query Language

3) What does SQL stand for? (v1)

Correct Answer: A) Structured Query Language

5) Which clause is used in SQL to filter the records? (v45)

Correct Answer: A) WHERE

7) Which SQL statement is used to extract data from a database? (v12)

Correct Answer: A) SELECT

9) Which SQL statement is used to extract data from a database? (v22)

Correct Answer: A) SELECT

11) In relational databases, normalization is used to: (v40)

Correct Answer: A) Eliminate data redundancy

13) Which clause is used in SQL to filter the records? (v25)

Correct Answer: A) WHERE

15) Which command is used to remove all records from a table in SQL? (v43)

Correct Answer: A) DELETE

17) In SQL, which keyword is used to sort the

2) Which SQL function is used to count the number of rows in a SQL query? (v38)

Correct Answer: A) COUNT()

4) In SQL, which keyword is used to sort the result-set? (v46)

Correct Answer: A) ORDER BY

6) Which command is used to remove all records from a table in SQL? (v13)

Correct Answer: A) DELETE

8) In SQL, which keyword is used to sort the result-set? (v16)

Correct Answer: A) ORDER BY

10) Which clause is used in SQL to filter the records? (v5)

Correct Answer: A) WHERE

12) In relational databases, normalization is used to: (v10)

Correct Answer: A) Eliminate data redundancy

14) In SQL, which keyword is used to sort the result-set? (v26)

Correct Answer: A) ORDER BY

16) What is a primary key in a database? (v44)

Correct Answer: A) A unique identifier for each record

18) What is a primary key in a database? (v4)

result-set? (v6)

Correct Answer: A) ORDER BY

19) What is a primary key in a database? (v24)

Correct Answer: A) A unique identifier for each record

21) In relational databases, normalization is used to: (v30)

Correct Answer: A) Eliminate data redundancy

23) What is a primary key in a database? (v14)

Correct Answer: A) A unique identifier for each record

25) Which SQL statement is used to extract data from a database? (v32)

Correct Answer: A) SELECT

27) Which SQL function is used to count the number of rows in a SQL query? (v48)

Correct Answer: A) COUNT()

29) Which command is used to remove all records from a table in SQL? (v3)

Correct Answer: A) DELETE

31) Which SQL function is used to count the number of rows in a SQL query? (v8)

Correct Answer: A) COUNT()

33) Which clause is used in SQL to filter the records? (v35)

Correct Answer: A) WHERE

35) Which SQL statement is used to extract data from a database? (v42)

Correct Answer: A) SELECT

37) Which SQL function is used to count the number of rows in a SQL query? (v28)

Correct Answer: A) COUNT()

39) Which command is used to remove all records from a table in SQL? (v23)

Correct Answer: A) DELETE

41) Which clause is used in SQL to filter the records? (v15)

Correct Answer: A) A unique identifier for each record

20) In relational databases, normalization is used to: (v50)

Correct Answer: A) Eliminate data redundancy

22) What does SQL stand for? (v11)

Correct Answer: A) Structured Query Language

24) Which command is used to remove all records from a table in SQL? (v33)

Correct Answer: A) DELETE

26) In SQL, which keyword is used to sort the result-set? (v36)

Correct Answer: A) ORDER BY

28) Which SQL statement is used to extract data from a database? (v2)

Correct Answer: A) SELECT

30) A FOREIGN KEY in one table points to a _____ in another table. (v7)

Correct Answer: A) PRIMARY KEY

32) What does SQL stand for? (v21)

Correct Answer: A) Structured Query Language

34) Which SQL function is used to count the number of rows in a SQL query? (v18)

Correct Answer: A) COUNT()

36) What does SQL stand for? (v41)

Correct Answer: A) Structured Query Language

38) What is a primary key in a database? (v34)

Correct Answer: A) A unique identifier for each record

40) In relational databases, normalization is used to: (v20)

Correct Answer: A) Eliminate data redundancy

Correct Answer: A) WHERE
